

Business License Definitions

- **Input Date:** This is the date the record was typed into Record Information Services' database. Not to be confused with the date of transaction, or date of record.
- **Company Name:** Name of the company obtaining a business license.
- **Address:** Address of company obtaining a business license.
- **Filing Date:** The date the business license was filed at the county clerk's office.
- **Company Description:** This only populates for certain counties.
- **Filing Number:** The number referencing filing document.
- **X & Y:** Identifies the latitude and longitude coordinates of the property.
- **Census Tract:** The census is conducted by the US Census Bureau every 10 years. It identifies certain geographic areas by census tract and census block. The census tract reflects median numbers when it comes to age and income. It is a generalization about a specific area, not by any means an exact science or number.
- **Census Age and Income:** When selecting an income range, those numbers will reflect a median household income, not an average of the census tract area. The median age is identified by using the census block as a benchmark which does reflect a more accurate picture of a geographic area.
